

Manish Modwani

Software Engineer II | Java & Distributed Systems

+91 9784860233 • manimod7@gmail.com • [LinkedIn](#) • [GitHub](#)

Professional Summary

Software Engineer II with **4+ years of experience** delivering high-impact solutions at Amazon and PayPal. Expertise in Java backend development, microservices architecture, and payments infrastructure and financial accounting systems. Proven ability to own projects end-to-end—from concept through deployment and optimization—while driving scalability, reliability, and cross-functional collaboration. Strong alignment with Ownership, Dive Deep, and Bias for Action.

Technical Skills

Languages & Core Concepts: Java, C++, OOP, Data Structures & Algorithms
Frameworks & Tools: Spring Boot, Node.js, n8n, REST APIs, Git, CI/CD, Testing Frameworks, Code Reviews
Data & Cloud Platforms: SQL, DBMS, AWS (S3, EMR, ECS, Redshift, DynamoDB, CloudWatch, Kinesis, Glue, Lambda, IAM, CloudTrail, Bedrock, CodePipeline, CDK, Secrets Manager)
Design & Architecture: High-Level Design, Low-Level Design, Microservices, Event-Driven Architecture, Distributed Systems, Agile, SDLC
Soft Skills: Customer-Centric Thinking, Intellectual Curiosity, Strategic Vision, Uncompromising Quality Standards, Innovation & Simplification, Cross-Functional Influence

Professional Experience

Amazon Sep 2025 – Present

Software Development Engineer II
Digital Acceleration | Financial Record Keeping for Digital Products

- Onboarded and customized revenue booking systems for Amazon Photos, Eero, Alexa Protect, and Alexa Plus, enabling accurate month-end financial close operations across digital product lines.
- Built an automated reconciliation system ingesting monthly Apple financial reports to generate adjustment bookings, resolving discrepancies in quantity, FX rates, and commissions for in-app purchase revenue across Prime, Audible, and other digital businesses.
- Engineered adjustment pipelines aligning Amazon's internal revenue records with Apple's settlement data, handling spot vs. month-end FX conversions and unit-level mismatches at scale.

PayPal Jul 2022 – Sep 2025

Payments Platform | System of Record for PayPal's Global Payments Data

Software Engineer II Oct 2024 – Sep 2025

- Developed highly reliable, low-latency, config-driven payment systems with 99.9999% availability, enabling low-code deployment of complete payment lifecycles and reducing new feature development time by 80%.
- Architected the migration of monolithic services to microservices, handling over 4 billion daily read/write requests across all PayPal payment options, ensuring seamless transaction processing at global scale.
- Orchestrated LLM-powered workflows leveraging embedding models to index code repositories into vector databases, enabling contextual code retrieval and generation.

Software Engineer Jul 2022 – Sep 2024

- Led system enhancements for key business initiatives, boosting revenue capture and transaction efficiency across major payment networks.
- Spearheaded migration to advanced testing frameworks, cutting regression time by 30% and accelerating go-live timelines.
- Implemented a centralized data load library, reducing redundancy by 15% and enhancing core system maintainability.
- Optimized key APIs and components, cutting critical service latency by 25%, improving data integrity by 20%, and ensuring peak load stability.

Amazon Jan 2022 – Jun 2022

SDE Intern
Ship Tech | Tech Platforms for Cross-Border Delivery

- Built APIs generating manifest documentation previews for delivery partners, boosting system interoperability and cutting documentation preparation time.
- Created a data processing tool for customs clearance during the Brexit transition, streamlining cross-border operations and reducing processing time by 40%.

Nectorr Labs May 2020 – Jun 2020

SDE Intern

- Developed TextConnect, a real-time web chat application using Node.js and Socket.io, enhancing user connectivity and communication for seamless messaging and interaction.

Education

B.E. (Hons.) Electrical & Electronics Engineering | BITS Pilani, Hyderabad Campus 2018 – 2022
Software Development | Scaler School of Technology 2024 – 2025

Awards & Recognition

- PayPal Spot Award** — Spearheaded delivery of critical business initiatives that drove significant revenue growth for PayPal.
- Runner-up, PayPal Hackathon** — Designed an innovative log-analysis tool that rapidly groups, analyzes, and triages call logs and failures, accelerating root-cause investigation.
- PayPal Props Award** — Architected a config-driven payment system with six nines availability and no-code deployments.
